PROFESSIONAL SUMMARY

A flexible-oriented fresh UI/UX Designer and final-year Business Computing student with a strong foundation in human-centred design principles especially Design Thinking process, web technologies, system architecture, digital interface creation, and front-end web development. Experienced in leading end-to-end UX cycles from competitive analysis and persona creation to high-fidelity prototyping and usability testing. Combines clear written communication and structured research with visual design to create accessible, user-friendly digital experiences. Passionate in exploring variety of fields and helping around peers.

TECHNICAL & CORE SKILLS

UI/UX & Visual Design	Information Architecture, Design Systems, User Flows, Canva, Figma, Wireframing, Prototyping, Visual Design
Front-End & Technical	HTML, CSS, JavaScript (fundamentals), Python (basics), Kotlin (basics), Responsive Web Design, Vibe-coding
Research & Workflow	Requirement Gathering, Process Documentation, Content Strategy, Layout Design using Microsoft and Google workspaces
Languages	Burmese(Native), English(B2/C1), Mandarin Chinese(HSK2), Japanese(N4), Hindi(Inter)

RELEVANT EXPERIENCE

Content Writer & Researcher Volunteer <i>Standfirst Institute</i>	Remote 2024
- Delivered 10+ research reports, content writing for social media blog posts and business assets for the Business Development Department on time using structured multi-source research methodologies. - Improved stakeholder report clarity and reduced average report length by ~20% by restructuring information hierarchies without reducing analytical quality.	
Digital Media Management Volunteer <i>Art of Living Myanmar</i>	In-Person & Remote 2023
- Contributed to an estimated 30-40% increase in campaign audience engagement by co-designing a structured content calendar, producing assets via Canva, ads management, building relationship with (potential) customers. - Expanded campaign reach across 3 multilingual communities (English, Burmese, Hindi) by translating, content writing.	
Virtual Assistant & Academic Guide (Private tutoring clients)	Online & In-Person January 2024 - 2026
- Supported 5+ clients with structured research and academic workflows, reducing per-session preparation overhead by developing standardized research frameworks. - Tutored primary/secondary-level learners, and old learners in their (state/international curriculum) academic subjects, mainly in foundational Math, English, digital/computer skills using structured lesson plans tailored to individual pace. - Reduced lesson preparation time by ~30% per week by building reusable digital template libraries.	
Volunteer Coordinator <i>Green Go Environmental Initiative, NMA University</i>	In-Person 2024
Supported coordination of 3 community environmental campaigns reaching 50+ student participants, as measured by event attendance and task completion rate, by contributing to logistics planning, stakeholder communication, and on-ground execution within a cross-functional student volunteer team.	

PROJECTS & ACADEMIC CASE STUDIES

NCC Level 4 & 5- Computing with Business Management, NMA | Final year BCIS SFC

EcoFootPrint – Digital Eco-Tourism UX/UI

DEEP Ideation Hackathon | 2026

- Co-designed an end-to-end web app platform addressing booking transparency and environmental preservation for Myanmar tourism.
- Executed full UX discovery and definition phases, including competitive analysis, SWOT analysis, user personas, end-to-end user flows, data collection with primary (surveys, interviews), secondary research findings.
- Developed a cohesive design system and interactive high-fidelity UI prototypes; Vibe coded front-end help for animation in the published product; conducted usability testing to validate design decisions.

InfinityGames – Project Management Dashboard UI/UX

Business Analysis Module | 2024-2026

- Mapped user requirement specifications (HSM), rich picture diagram (applied SSM) and structured user flows.
- Designed visual interface components and layout wireframes for a digital platform, prioritizing clean navigation and functional UI design.

Retail Camping & Social Media Web Platforms

Web Development Module | 2023-2026

- Designed and built responsive web interfaces using HTML, CSS, and JavaScript, and additionally MySQL, PHP (Laravel) in social media campaign full website development.
- Applied UI/UX design principles and produced supporting documentation: user requirements, data flow diagrams, and entity-relationship diagrams.

Relational Database Designs

Database Modules | 2024-2026

- Designed a normalised relational schema (3NF) and EERD for a game rental store, talent recruitment production, booking and transportation management, kitchen supplier business scenarios, implemented in MySQL with full CRUD functionality.
- Produced business analysis artefacts including use-case diagrams, system requirements specifications, and stakeholder analysis.

EDUCATION

Bachelor of Science in Business Computing & Information Systems

2026

Final Year | Expected: Early 2027 — Strategy First College - University of Lancashire

NCC Level 5 Advanced Diploma - Computing with Business Management

2023-2025

Completed 2025 — NMA College, Faculty of Information Technology

Bachelor of Arts English Literature

2022-2025

Completed 2025 — East Yangon University
